

TeamLease champions compliance adherence and information security

Adfactors PR | 05/01/2023 07:56 AM

TeamLease Services, one of India's largest staffing firms, trusted by hundreds of clients, for its compliance practices, has recently been recognized for its information security practices through the following awards for their Chief Information Security Officer:

- CISO (Chief Information Security Officer) of the Year 2022 award at the 4th Edition of CIO Conclave & Awards 2022*
- Cloud Security Risk Champion of the Year 2022 award at CSA Bangalore Chapter Annual Summit 2022*

These were awarded to Mr Archit Rajesh, General Manager - IT & Group Chief Information Security Officer, TeamLease Services.

*These awards come hot on the heels of the **TeamLease ISO 27001:2013 Recertification at the Group Level**, audited by BSI, which was successfully concluded in October 2022, and reinforces the trust and confidence placed in TeamLease by all their stakeholders.*

ISO 27001 is undeniably one of the most reliable testimonials about information security posture of an organization and has certainly helped TeamLease in earning the confidence of our customers about our maturity around information security, data privacy and IT compliance.

BSI is the world's first Standards Body and founding member of ISO. Since 1901, BSI has been helping organizations across the globe improve and capture best practice. Their certifications are considered a proxy for strong business processes and information security.

Commenting on these, Mr. Kartik Narayan, CEO, Teamlease Services said, "In today's digitalized world, information security is not a good-to-have anymore, it is the most critical element of any business, especially when dealing with millions of records of employment and pay related data. Our recertification and these awards for our InfoSec practice, is a reaffirmation of our vision and commitment of creating a secure Information Infrastructure and continue earning the trust of our customers and the industry at large."

Driven by the increased demand for services and solution in cloud security, the information

security and risk management products and services industry is estimated to reach more than [\\$188.3 billion](#) in 2023.
